

Egibi Floors flooring system

SPC RIGID floor with integrated underlay

The first-class SPC RIGID floor with an integrated underlay stands out for its excellent properties, long life and easy installation. Thanks to modern production processes, the surface of Egibi Floors is indistinguishable from real wood and perfectly captures its structure.

Skirting board

The SPC RIGID plinth by Egibi Floors in the same floor decor is designed to perfectly harmonize the appearance of the plinth with the floor covering.

The skirting board is designed to cover the space between the floor and the wall to create an aesthetically pleasing and finished interior look. The slats are made of hard plastic.

Floor transition profile Multi

The floor transition profile SPC RIGID is easy to install with Glue. It is designed to withstand daily use and maintain a 100% aesthetic impression of the floor.

The transition profile MULTI is a transition profile with a slight curve, which ensures an aesthetic connection when connecting floors at different heights up to a difference of 7 mm.

Floor transition profile T-Line

The floor transition profile SPC RIGID is a special type of transition profile designed for hard vinyl SPC (Stone Plastic Composite) floor coverings.

The transition profile T-LINE is a straight transition profile for joints between floors of the same height to be connected.

Egibi Floors flooring system

SPC RIGID step

A first-class floor with great properties, long life and easy installation. Thanks to modern production processes, the surface of Egibi Floors is indistinguishable from real wood and perfectly captures its structure.

Stair profile

The SPC RIGID stair profile from Egibi Floors in the same floor decor is a specially designed element to perfectly harmonize the appearance between the floor and the stairs. This step serves to cover and protect the front edge of the step and provides an aesthetically pleasing transition between the floor and the stair structure. Egibi Floors Stair profile decors are available in different wood variants.

Stair step

The SPC RIGID step is resistant to wear and moisture. By using the same floor decor from Egibi Floors, the stair step perfectly unifies the look between the floor and the staircase, thus creating a uniform interior look.
